

MAVERICK™ METER LIDS

*Smart Compatibility.
Proven Performance. Utility Ready.*

MAVERICK™ METER LIDS

Maverick Meter Lids are engineered for today's evolving utility demands. These composite lids offer the strength needed for tough environments—without the added weight of traditional materials. Available in both solid or thru-hole designs and a wide range of sizes (11¼" to 21¼"), these lightweight lids deliver lasting performance with smart AMI/AMR-ready features.

AMI/AMR VERSATILITY

Maverick lids are made with no rebar or metallic components, ensuring reliable radio signal performance for AMI/AMR systems.

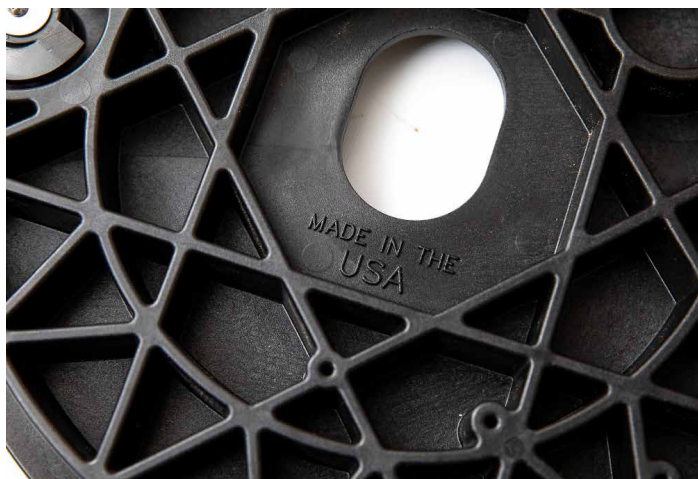

- Solid lids feature stand-offs to secure the transmitter under the lid. Optional threaded mounts are available.
- Thru-hole lids allow the transmitter to sit flush with the lid surface and are compatible with most AMI/AMR systems through the use of a removable smart insert.
- Smart inserts are available for popular systems like Badger Orion, Mueller, Neptune, and Sensus—and may work with with other systems.
- Easily upgrade or change transmitters without replacing the entire lid.

LIGHTWEIGHT STRENGTH

Built from rigid, fiberglass-reinforced polymer composite, these lids provide a 20,000 lb. proof load rating with significantly reduced weight compared to cast iron. This strength-to-weight ratio makes them easier to handle in the field while still delivering reliable performance in pedestrian and light-duty traffic areas.

DESIGNED FOR DURABILITY

Engineered for long-term performance, Maverick lids resist impact, fatigue, and environmental stress. The ribbed underside effectively supports higher loads with greater stiffness, while the polymer composite stands up to UV exposure, temperature extremes, and moisture. These lids are an ideal choice for demanding conditions.

CUSTOMIZABLE FOR YOUR UTILITY

Our lids can be customized with your logo, choice of lettering, and a large variety of colors to support identification, standardization, and theft deterrence.

Maverick lids are equipped with a standard AWWA #1 or #2 pentabolt. Most sizes include a worm gear locking mechanism for secure closure. 15" and 18" diameter lids come with a patent-pending spring-latch retainer system.

Customization of lettering, logo and color available.

Our meter lids are compatible with both A-style (flush-fit) and C-style (overlapping) frames, which are available in either cast iron or molded plastic.

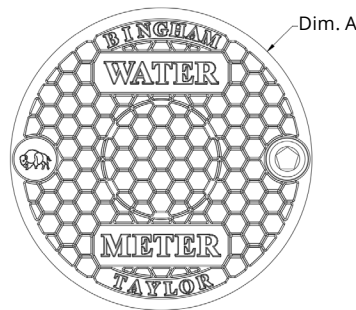

Pair the Maverick lid with a compatible meter frame and meter pit to create a complete, ready-to-install assembly.

PART SERIES	OUTER DIAMETER DIM. A	RIM THICKNESS DIM. B
PLDA11.25A5xx	11.25	0.50
PLDA12.25A7xx	12.25	0.70
PLDA12.50A5xx	12.50	0.50
PLDA15.25A7xx	15.25	0.75
PLDA16.25A5xx	16.25	0.50
PLDA18.75A5xx	18.75	0.50
PLDA21.25A7xx	21.25	0.75

All measurements are in inches.

Standard lettering is "WATER METER" but you can customize. Specify your lid diameter and style (Solid (S) or Thru-Hole for Badger Orion (TB), Mueller (TM), Neptune (TN), or Sensus (TS)).

THE BINGHAM & TAYLOR DIFFERENCE

Bingham & Taylor offers the most diverse product line in our industry, with timely service and quality products backed by a knowledgeable, dedicated staff.

We proudly manufacture 100% of our products in the USA—supporting domestic jobs, reliable supply chains, and federal compliance.

Founded on the principles of collaboration, invention, integrity, and excellence, we continue to move the industry forward by listening to our customers and improving every step of our process. We are also committed to sustainable manufacturing practices that reduce environmental impact. We believe that if you're not moving forward, you're falling behind.
