INFRASTRUCTURE SOLUTIONS

Bingham & Taylor has supported America's critical infrastructure with durable cast iron and innovative plastic utility access solutions proudly made in the USA and trusted by the people who build and maintain America's infrastructure.

We combine generations of manufacturing expertise with proven cast iron and innovative plastic products to deliver access solutions designed for long-term performance.

VALVE BOXES

Designed to provide secure, reliable access to underground valves while protecting critical valve components. The industry's most comprehensive valve box line, with cast iron, Bison™ thick-walled plastic, and combination configurations available in two-piece and three-piece assemblies or as individual components.

CURB BOXES

Protect and provide convenient access to 1/2"-2" curb stop valves on water and gas service lines. A complete line of Eclipse boxes and 2 1/2" and 3" curb boxes in cast iron, plastic, Bison, and combination configurations to accommodate a wide range of utility standards and installation requirements.

MARK SERIES VALVE BOXES

Engineered for large valve and fitting installations, these H-20 load-rated cast iron access solutions provide exceptional strength, stability, and long-term performance. Designed as a superior alternative to traditional concrete boxes, Mark Series products deliver lasting durability in demanding utility applications.

WATER METER & LARGE VALVE ACCESS SOLUTIONS

Complete access systems, including plastic meter pits, cast iron and plastic frames, cast iron and Maverick® composite lids, and heavy-duty cast iron MBX meter box assemblies. Available in a wide range of sizes and configurations to support reliable access and long-term field performance.

From the original Buffalo valve box to today's utility access solutions, Bingham & Taylor delivers the products utilities rely on every day. Our commitment to innovation, durability, and performance helps utilities protect and maintain critical infrastructure.

CLEANOUTS & GAS DRIP BOXES

Durable access solutions for sewer, drainage, and natural gas applications. Designed to provide convenient access to cleanout points and drip locations, these products are available in multiple sizes and configurations for long-term field performance.

TRACER WIRE & CATHODIC PROTECTION TEST BOXES

Designed to provide convenient access to tracer wire and cathodic protection systems, these durable access solutions support utility locating, testing, and corrosion monitoring programs. Many styles feature a lightweight plastic body with a cast iron rim and lid for durability and easier installation.

LEAK DETECTION SOLUTIONS

Designed to protect critical leak detection and monitoring equipment while providing convenient access for maintenance and service. Choose from a cast iron lid with thru-hole or a cast iron ring and composite insert assembly, which supports enhanced AMI/AMR signal transmission.

SECURITY & SAFETY SOLUTIONS

From valve identification and asset protection to stabilization, locking, and installation tools, these products help utilities improve safety, security, and operational efficiency. Designed to support critical infrastructure in the field, our solutions help protect utility assets while simplifying installation, maintenance, and access.

**We proudly manufacture 100% of our products
in the USA – supporting domestic jobs, reliable
supply chains, and federal compliance.**

**For over a century, Charlotte Pipe and Foundry has been a trusted,
steadfast name, crafting the foundation of homes and buildings.**

**Our commitment to meeting the expectations of our customers,
associates, and owners is supported by our ironclad conviction of
making things right.**

We bring the wisdom of a 125-year legacy and the grit of a modern
powerhouse to projects, and now, our reputation extends beyond the
building to the core of our communities through our Infrastructure
Division. Our Bingham & Taylor product line is the most diverse in
the industry, providing reliable cast iron products made in the USA.
